

EVACUATION PLAN – WAUSAU CENTER

Familiarize yourself with the nearest exits from your classroom or office.

Know your designated meeting point/safe zone. The Wausau Center meeting place is the A parking lot. For students in the Health Services Building, the safe zone is the parking lot out in front of the building. (fire = 50 ft away from the building). Going to the meeting point allows for a designated emergency staff to do a head count and know if all have exited safely.

If you find yourself in a critical situation where you need to exit the building,

- Notify other people in the area – if it is a fire and you see flame, pull the fire alarm.
- Proceed to the nearest exit – leave your things, don't try to take a bunch of items with you
- Go to the designated meeting point
- Please be aware of those around you that may need assistance and help them exit the building, if necessary.
- Wait for the all clear – this will most likely come from your supervisor, faculty, or law enforcement

Assisting those with Disabilities, Evacuation Guidelines

A staff member, faculty member, or student will be paired with a person with disabilities to assist them with evacuating the center should it become necessary during an emergency.

Persons with Visual Impairments

Inform an individual with visual impairments of the nature of the emergency, and offer to guide him/her. As you evacuate the center, advise the individual: 1.) where you are at; 2.) where you are going; 3.) obstacles in the way; and, 4.) any other important information. Do not take the individual you are guiding by the arm, offer your arm instead.

Persons with Hearing Impairments

If you are unable to see the fire alarm system's visual indicators from your location, an alternate means of warning may be necessary for an individual with a hearing impairment.

1. Write a note telling the individual of the danger and the safest evacuation route.
2. Tap the person on the shoulder or turn the light switch on and off to gain their attention, and then indicate through gestures, or in writing, what is happening and what to do.

Persons using Crutches, Cane or Walkers

If an individual is having trouble exiting the center in a quick and safe manner, they may be carried out of the building. Options such as the firefighter's carry or two-person locked arm carry may be used. In addition, the person can be carried out while sitting in a chair.

Non-Ambulatory Persons

Most non-ambulatory individuals will be able to evacuate a building on their own. If assistance is needed, remember lifting someone in this state may be painful and may cause injury. Non-ambulatory individuals have respiratory complications. Remove them from smoke or fumes immediately.

Always consult the person who is being evacuated as to their preference with regard to:

1. Ways of being removed from the wheelchair.
2. The number of people necessary for assistance.
3. Whether to extend or move extremities when lifting because of pain, catheter bags, braces, etc.
4. Whether a seat cushion or pad should be brought along if he-she is removed from the chair.
5. Being carried forward or backward on a flight of stairs.
6. After-care, if removed from the wheelchair.

AFTER EVACUATION:

1. Once outside meet the Fire Department so that you can give them information about the fire.
2. Once outside you are not to reenter the structure for any reason.
3. Once the Wausau Fire Department is on the scene, the Fire Chief or the next highest-ranking official will be in charge of the scene. The fire official will determine when or if it is safe to return to a building. The fire official will also be the one to turn the fire scene back over to the university.
