Setting the default media player

After logging in to your myUIU, click the “LiveText” link in the myUIU section on the left side of the page. You may experience the security pop-up as shown below. You would be safe clicking either yes or no, but if you click yes, you may not be able to see the icons (play button). Instead, they will show as a red X.
To view the videos, click one of these for pc format, or one of these if you have a mac.

If you are using a PC and the video does not come up, the computer may not have a default video player selected. Go to your control panel and click on “Default Programs” (Note: Your view may be a little different than above.)
Next, click on “Set your default programs”
Click on “Windows Media Center”, then “Set this program as default”, then “OK”
You can now close this window.
You may now try the video again. If these steps do not work, please contact the UIU IT Help Center for further assistance at (563) 425-5876, or helpdesk@uiu.edu
