Using the Cisco AnyConnect VPN Client

1. Start by double-clicking the Cisco Any-connect icon on the desktop, or by finding it in the start menu.

2. When the window opens, type in “vpn.uiu.edu” in the “Connect to:” field. Then click on the ‘select’ button.
3. Change the dropdown menu for ‘Group’ to ‘uiu_employee.’ The username and password field are then filled out with your username (your email prefix, without the @uiu.edu etc.) and your email password. Click the “Connect” button at the bottom of the window.
4. Upon connecting successfully, this dialogue box will appear. Accept the agreement to proceed.

5. This icon with the golden lock indicates that you are successfully connected to the Fayette campus network.

6. Remember to right-click on this icon and choose either ‘quit’ or ‘disconnect’ to close your connection! (the icon is found in the system tray, in the bottom right of the windows taskbar)
